## **SOUND ABSORBING BOARD**

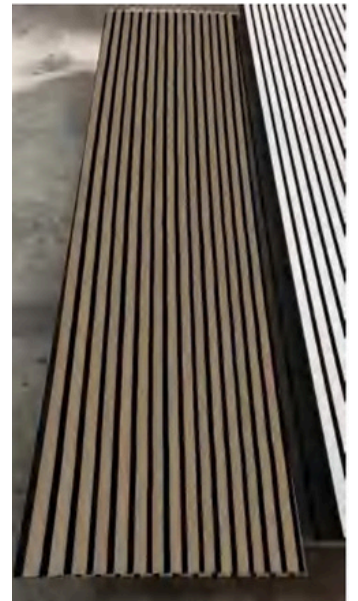

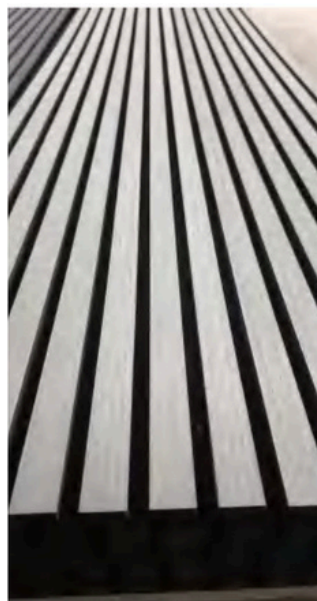

Acoustic M Sound Absorbing Grating panels are decorative acoustic solutions combining polyester fiber backing with MDF slat detailing to enhance both sound performance and interior aesthetics. Designed to absorb mid-to-high frequency noise, these panels create quieter and more comfortable environments in residential and commercial spaces such as offices, conference rooms, hotels, and home theaters. The material's eco-friendly composition, flame-retardant properties, and moisture resistance ensure safety and durability across diverse applications. Available in a wide range of colors and finishes, Acoustic M panels integrate seamlessly into contemporary interior designs while offering flexible cutting and installation capabilities. Their modular construction simplifies installation using adhesive and mechanical fixing methods, reducing labor time and project complexity. In addition to acoustic benefits, the textured slat design adds visual depth and warmth to feature walls and ceilings. Acoustic M Sound Absorbing Grating panels provide a balanced solution for designers seeking functional noise control combined with sophisticated decorative appeal.

# SOUND-ABSORBING GRATING

SIZE: 600 \* 2400MM/1200\*600MM

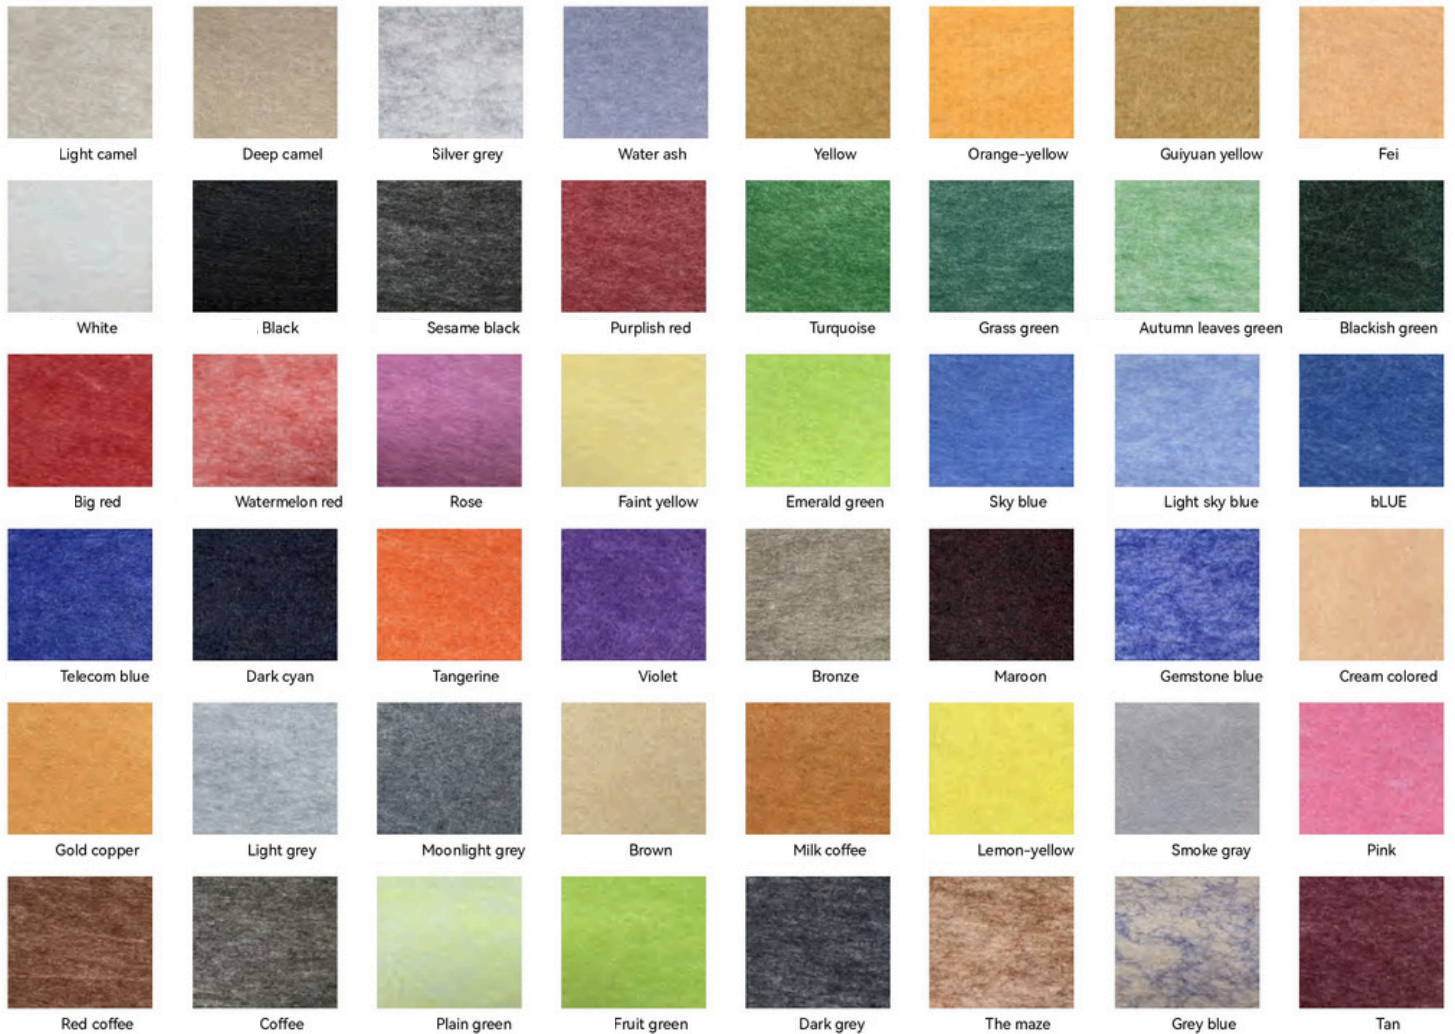

## BOTTOM POLYESTER FIBER SOUND-ABSORBING BOARD

- Specification: The thickness of the bottom plate is 9mm, and the density of Flat noodles is 22mm in total. The size is 600 \* 2400mm/1200\*600mm
- Operation method: Use nail free adhesive to directly paste and cut freely
- The width of the density board is 27mm, the spacing is 13mm, and the thickness is 12-13mm (the color of the density board and the bottom plate can be freely matched)
