POLYURETHANE SERIES (PU)

PU Panels are lightweight decorative wall solutions engineered from eco-friendly polyurethane and finished with durable paint coatings to replicate natural stone textures with impressive realism. These panels provide a cost-effective alternative to traditional materials while significantly reducing installation time and labor requirements. Their stable structure, moisture resistance, and flame-retardant properties make them suitable for both indoor and selected outdoor applications across residential and commercial environments. PU Panels are easy to cut, handle, and install using adhesive or mechanical fixing methods, allowing fast project completion without heavy equipment. With a lifespan of up to 30 years indoors, they offer long-term performance with minimal maintenance. The diverse range of styles and color variations supports versatile design applications including accent walls, retail interiors, restaurants, and villas. By combining affordability, durability, and aesthetic versatility, PU Panels deliver a practical solution for designers and contractors aiming to achieve premium visual outcomes within tight budgets and timelines.
