## SOLID WOOD MOSAICS

---

Solid Wood Mosaic panels celebrate the authenticity and warmth of natural timber through handcrafted parquet compositions that create artistic and textural feature surfaces. Manufactured from premium dried wood species such as oak, walnut, and teak, each panel showcases unique grain patterns that enhance interior character while supporting sustainable design principles. The modular mosaic construction improves dimensional stability and minimizes warping, ensuring long-term durability across various applications. In addition to aesthetic value, wood mosaics offer natural acoustic and thermal insulation benefits, contributing to enhanced indoor comfort. Surface treatments including staining, carbonization, and protective coatings improve resistance to moisture, stains, and wear, while maintaining the organic appeal of real wood. These panels are easy to install using adhesive systems and require minimal maintenance, making them suitable for residential and commercial feature walls, hospitality spaces, and boutique interiors. Solid Wood Mosaic solutions provide designers with a timeless material that blends craftsmanship, sustainability, and functional performance.

# SHIPWOOD

SIZE 300 X 300 MM

- 100% Solid Wood – Crafted from premium natural timber
- Exclusive Shipwood Design – Reclaimed wood-inspired texture with bold grain definition
- Handcrafted Mosaic Layout – Adds depth, character & artistic visual movement
- Durable & Long-lasting – Built to withstand time & retain natural beauty
- Luxury Interior Appeal – Perfect for statement walls & high-end décor
- Easy Installation – Modular 300 x 300 mm panels for seamless coverage
